## Accessories

## Which is the right laptop for your school?

Screen size, form factor, durability and connectivity are the key features you should consider when making your choice.

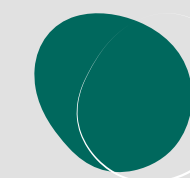

Let us deepen these features.

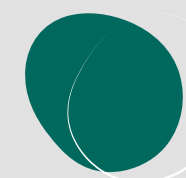

SCREEN SIZE

DURABILITY

FORM FACTOR

CONNECTIVITY

## Acer for Education devices come in several screen sizes.

If you are looking for a light and easy to carry device for younger students, an 11.6-inch laptop is your best option. If students need more room for working or multitasking, our portfolio also includes 12-inch and 14-inch models.

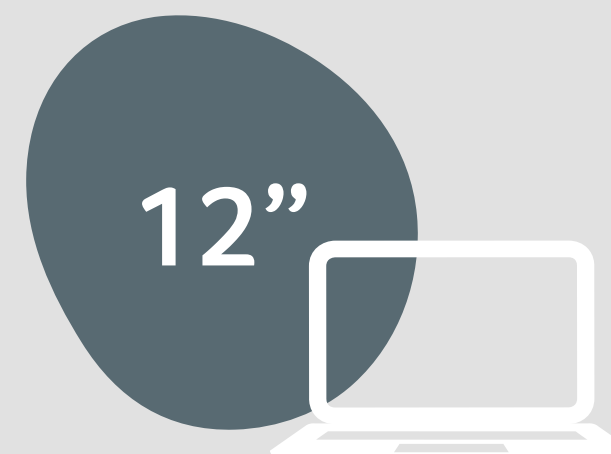

### Light and easy to carry

Devices with an 11" screen are **feather-light** and can easily be carried anywhere. Plus, they are **compact** enough to be placed on desks of any size while the keyboard is just right for younger students' hands. Available as clamshell or convertible notebooks, they come with a sturdy, **durable design**.

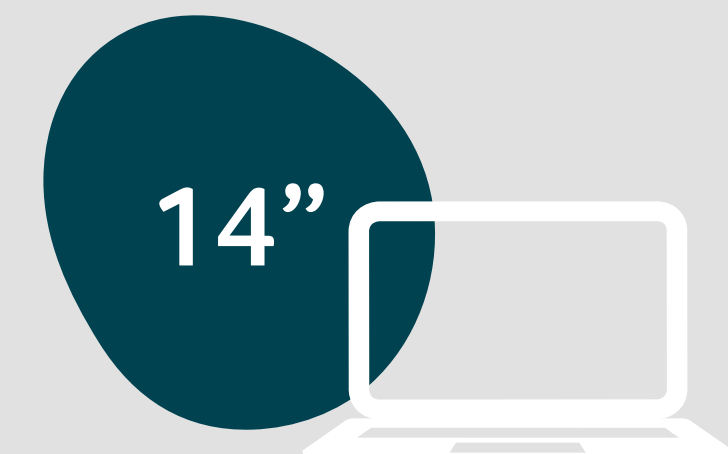

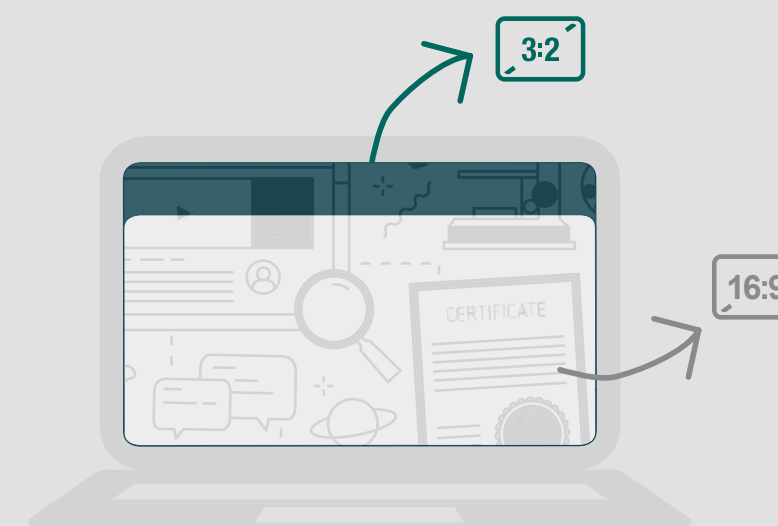

### Quick fact

In 2020, about 62%<sup>1</sup> of laptops shipped to schools in EMEA had a screen between 11" and 13".

### Less scroll and more viewing space

Scroll less than ever with a 3:2 aspect ratio display<sup>2</sup>. With **18% more vertical screen space** than 16:9 displays, students will be able to read or work on documents with more ease and convenience than ever before.

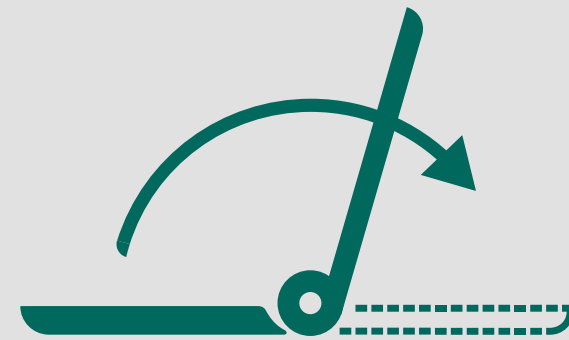

### Mobility and comfort

A 14" screen offers the perfect balance between visual experience and portability. There is more space for multitasking, reading and working on documents while still in an easy-to-carry design.

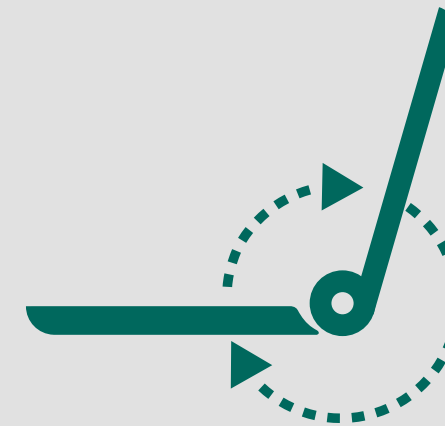

## The form factor is an essential aspect to consider when evaluating laptops for school.

Depending on their age, students have different tasks to deal with. Clamshell or convertible: two solutions, each with specific characteristics but both capable of meeting students' needs.

### Clamshell design

This is laptops' traditional form factor. Acer for Education devices can be opened at **180 degrees** to lay flat on a desk for sharing content with other students.

### Convertible design

Laptops with a convertible design come with a display that can turn **360 degrees**. Students can work comfortably in many situations by easily adapting their devices to tablet, tent, or display modes. They can also count on additional features designed to enhance the learning experience.

### Quick fact

In 2020 the convertible laptops' share in EMEA grew by 15%<sup>1</sup>.

### Acer Active Stylus

With the optional dockable Acer Active Stylus featuring 4096 levels of pressure sensitivity, students can enjoy a realistic pen-on-paper feel.

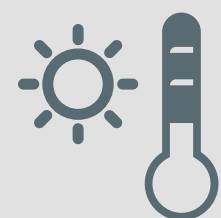

### Autofocus world facing camera

The autofocus world-facing camera, placed above the keyboard, on top of driving better collaboration and more flexibility in learning, can help students to create more engaging school projects.

## Everybody knows that students' laptops face plenty of stress during their lifecycle.

Devices for students' and teachers' use should be protected against drops, knocks and intense daily use.

HIGH  
TEMPERATURE  
49° C

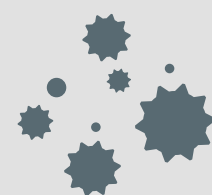

LOW  
TEMPERATURE  
-32° C

HUMIDITY  
59% ~ 88% RH

RAIN  
342.5 ml/m<sup>2</sup>/min

SAND AND DUST  
0.367 G/HR

VIBRATION  
7.7 GS PER AXIS

MECHANICAL  
SHOCK  
122 cm

To make sure that Acer for Education laptops can withstand the wear and tear of daily use in the classroom and outside, we test them under MIL-STD-810, a United States Military Standard that assesses limits to the conditions the devices will experience throughout their lifecycle.

MIL-STD-810 addresses a broad range of conditions, including exposure to high and low temperatures, rain, humidity, sand and dust exposure, vibration and mechanical shock (drops from 122 cm).

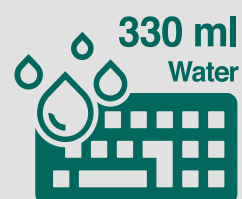

## Acer laptops for Education are designed to be in for the long haul.

They have a sturdy, ruggedized design to help them survive any mishap that might happen in or out of the classroom.

### Ruggedized design

The impact-resistant body with a shock-absorbent bumper protects the device from drops as high as 122 cm and up to 60 kg of downward force.

### Drainage design

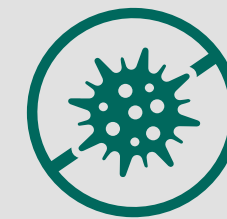

The unique drainage design of the keyboard protects internal components from upwards of 330 ml of liquid.

### Mechanically anchored keys

Mechanically anchored keys cannot be picked and remain where they should.

So the keyboard stays in good shape even when several students share the same device.

### Anti-Microbial Treatment

Acer's latest educational notebooks come with an internationally certified antimicrobial (silver-ion) solution covering the screen and keyboard area to keep the surfaces as clean and protected as possible. Plus, they come equipped with **Antimicrobial Corning® Gorilla® Glass**<sup>1,2</sup> that keeps the surface cleaner for longer and reduces the growth of odour and stain-causing microorganisms. On top, the Antimicrobial coating adds improved durability and resistance to scratches.

## **Acer's laptops are outfitted with batteries that guarantee long hours of learning and studying.**

You need power outlets and power adapters to charge a laptop, but it might prove challenging on a school trip.

In addition, cables and adapters are easy to lose or forget. With a battery life that lasts well past a whole school day, you can enjoy uninterrupted teaching and learning.

With a school-day or more of battery life<sup>1</sup> in one charge, students can breeze through their classes and have plenty of battery to spare for extra projects or fun.

## Connectivity is essential in a laptop for school.

A fast and reliable connection lets you access resources, collaborate and share projects. Acer devices for Education feature the latest connectivity technologies, including Wi-Fi 6, 4G LTE and at least one USB Type-C™ port with full functionality.

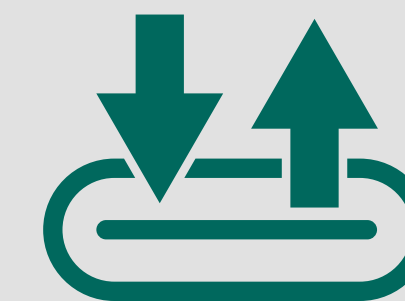

LTE

### Smoother Wireless Experience

Designed to give users a smoother and more enjoyable wireless experience, Wi-Fi 6 provides a strong and consistent signal, doubling the maximum speed compared to previous generation. With Wi-Fi 6 you can also count on improvements in power consumption, security protocol and efficiency in high-density scenario.

When out of range, the optional 4G LTE provides students with extra personal bandwidths to keep them always connected.

### USB Type-C™ and More

The revolutionary USB Type-C™ port puts a world of multitasking options instantly within reach, while the device remains thin, light and ultra-portable. But why is this port revolutionary? First of all, the connector is reversible, which means it's easier to plug in.

Secondly, thanks to its full functionality, you can use it to directly charge your laptop, plug it to multiple monitors and even connect to cabled network. Last but not least, you can get immediate connectivity to all your devices using a multi-port dongle.

## Configuring and enrolling a fleet of devices has never been so easy.

All Acer laptops for Education can be automatically deployed and enrolled to free the IT department from this time-consuming task.

### Windows Autopilot<sup>1</sup>

Windows Autopilot simplifies the way devices get deployed, reset, and repurposed, with an experience that is zero touch for IT.

#### Device registration

Acer automatically adds new devices into the school's Azure AD tenant.

#### Profile creation & assignment

Customize set up and configuration by creating a profile to assign to your school's devices.

#### Shipping & deployment

Acer ships devices to the schools. Turn the device on, go online, and Windows Autopilot delivers apps and settings.

### Chrome OS Zero-touch enrollment<sup>2</sup>

With zero-touch enrollment Chrome OS devices will automatically enroll into a school's domain as soon as the end user connects to the internet.

#### Really ready out of the box

Once an end user receives the device, all they need to do is get online, log in, and they're ready to go.

#### Eliminate time needed to manual configuration

Zero-touch enrolment ensures that Chrome OS devices are registered to automatically enroll once in the hand of end users. This eliminates the need for manual device enrolment by IT department or end users.

#### Built with security in mind

Hardware-backed attestation secures the identity of each device and prevents attackers from spoofing devices.

1. Requires Windows 10 Pro and an active Intune for Education license

2. Requires Chrome Education upgrade and a compatible Chrome device. All the Acer Chromebooks for Education manufactured in 2021 are compatible.

Acer convertible devices proved to be flexible and adaptable to different kind of activities and they can be easily employed by students with different abilities and educational needs.

**Luisa Guarnieri**

Math & Science Teacher - Istituto Comprensivo "B. Sestini", Italy

We chose to work with Acer laptops because of the ruggedized design. You could even drop or spill water on it without breaking it.

**Hans Kroes**

Policy Officer Agora Foundation - Primary School De Golfbreker, Netherlands

Acer Chromebook has been really built for education. The ruggedized shells, the spill proof keyboards, the set of friendly applications, it's just a really well made product.

**Neal Oates**

Vice Principal - Star International School student, Dubai

The Acer convertible devices allowed us to use a versatile, flexible device; they can go easily between being tablet and a laptop, which lends itself to multiple subjects. The ability to use a stylus, rather than just using a keyboard or a finger, is an excellent addition, an excellent tool for students to be using on a daily basis.

**Michael Williams**

Secondary Digital Leader - British School Al Khubairat, United Arab Emirates
